MARKET APATHETIC

Many Traders Were Out of City and Little Was Done.

PRICE MOVEMENT TRIVIAL

Dull, Sagging Tendency Gave Way to Strength at Last, and Active Stocks Closed Fraction Above Level of Thursday Night.

(By Associated Press.)

NEW YORK, July 3.—The members of the Stock Exchange, who had petitioned the Board of Governors to make to-day a holiday, ignored the session to-day, and went out of town. The handful of members who attended the session traded among themselves almost exclusively, and there was scarcily in echo of the outside world in the board room. As a ronsequence to-day's dealings fell below 100,000 shares to a new low level of activity for the year.

The fact that the grain and provision markets were closed for a holiday increased the apathy in the stock market, whing to the large importance attached at this time to the progress of the divides with it at the press of the cotton market were closed for a holiday increased the apathy in the stock market, while the trade of the cotton market over the publicative the cotton market over the publicative forces. There was feverish activity in the cotton market over the publication of the government's estimate of the condition of the government's estimate of the condition of the cop as of June 26th. But, the cornered condition of the staple leaves little room for just inferences of crop conditions from the price movement. The improvement in the condition of the crop since the last report was received with satisfaction in the stock market. Neither this influence nor any other caused anything but a trivial movement of prices one way or the other.

market. Neither this influence for any other caused anything but a trivial movement of prices one way or the other.

The bank statement was without appreciable effect, although the showing was a weak one. There were very few features in the market. The drop to eighty of Hocking Valley was explained by the official announcement of the payment of 166 for the pooled stock constituting a majority of the fissue, while the provision made for the minority holders. The minority stockholders at one time cherished the hope of a guarante of 4 1-2 or 5 per cent, dividends. The announcement of an advanced rate of a points in United States Express charges was followed by a fail of points in United States Express of parameters of the week's exports of grain showed a decrease of several hundred thousand busels.

The dull sagging tendency of the early part of the day gave place to strength at the last which brought the level of prices for the principal active stocks to a fraction above last night and the closling was firm.

The bond market was dull and tregular. Total sales, par value, \$1,500,000.

(Special to The Times-Dispatch.)

NEW YORK, July 3.—The opening was lower as the trend of the London market was no energing, and the morement of the previous sy had shown at least a fairly aggressive beartry.

as the trend of the London market was no encouraging, and the morement of the previous flay had shown at least a fairly aggressive bear party.

The uncertainty as to the bank statement theeked outside interest, and this was a little selling for London and the West.

The very marked decline in Hocking Valley was obviously a case of a minority steek flading its own level. The position of the soft coal trade is fairly good, but the profits are not likely to be as considerable as during the authorities strike, so that a conservative dividend policy is inevitable, especially as Pennsylvania appears to be one of the controlling interests.

Alchison showed about the nest aggressive bear party of any stock in the room, but was probably to some extent protected by the short disclosed in the leasn crowd.

The bull account in Baltimore and Ohlo was rather weak, and traders were testing it for stop orders.

PRODUCE IS DULL

Affected by Street-Car Strike and the Intense Heat.

Affected by Street-Car Strike and the Intense Heat.

Business on the produce market of Richmond is practically at a standstil. There is a lot of stuff of all sorts, but it is hanging fire, as it were, and is being eaten up by the weather, to express it in choice and readable terms. During the supposed busy hours of the day commission men stand around idly and discuss various and sundry interesting topics, including that pertaining to the situation with which they are contending.

Two chief causes are operating to render business at this time remarkably flat and unsatisfactory—the strike of the street car men and the intense heat of the atmosphere. The first began first and is being most heavily felt; the latter is just beginning, but will stay longer, and grobably in the long run do more injury than the other. Some ninety-eight degrees of heat, which felt like a million of the same, were settled over Cary Street yesterday, and men and horses afike were dull and listless. The day's sale showed but a small decrease in the amount of stuff on hand, and so it promises to continue for some time to come. People are physically unable to eat in large quantities during the hot weather, and during this time the produce business must drop off. Besides that, the summer exodus is beginning, and will soon be flowing in full tide. People will be living off of odds and ends and spending their money at the seashore.

ditions prevailing on the market now and last year. On July 3, 1902, the Grain and Cotton Exchange issued the following

comments:

TOBACCO.—Dark fired tobacco continues in good demand, with very light offerings and receipts. We advise shippers to send their tobacco in good keeping order, so they may obtain best prices. Brights—Quiet, but firm at unchanged quotations. Sun-cured—Medium, low reades, and luga were active. The prices

Light Trading in Prints.

(By Associated Press.)

FALL RIVER, MASS., July 3.—The sales in the print cloth market for the week will reach a total of about 75,000 pieces. Trading has been of a very light character during the week. There has been a good demand for all classes of goods, but manufacturers still continue to be indifferent sellers, and especially for deliveries beyond a month's time, under existing conditions.

On account of the shortage of cotton and the continued high prices for the raw material, manufacturers are taking adventuating to prolong the holiday by closing the mills the middle of the week over Sunday.
